

# Renaissance

Issue 06  
May 2023

Dear Colleagues,

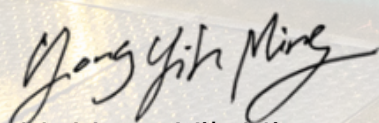

## NEW ASSETS

We have crossed our first 100 days of Project Renaissance since our Wall-Breaking Ceremony on 3rd January 2023. I am glad to share that we have arrived at a phase where new departments will be unveiled in their new forms and locations henceforth.

We would like to express our sincere gratitude to everyone for their unwavering patience and understanding throughout this transformative journey of Renaissance.

In this edition of Renaissance, I'll provide insights on these area:

- (1) New Laboratory / Phlebotomy at Mount Elizabeth Medical Centre (MEMC) Level 1
- (2) New Executive Health Screeners (EHS) at MEMC Level 1
- (3) Recycling / Upcycling our Mount Elizabeth's Legacies

Mr Yong Yih Ming  
Chief Executive Officer  
Mount Elizabeth Hospital

# WE HAVE MOVED

From 2nd May 2023, the blood-taking and specimen collection department of Laboratory will start its' operations at the new location at Mount Elizabeth Medical Centre (MEMC) Level 1 (the former location of UOB bank). This new location will provide new convenience for the 250 patients who used to walk from MEMC to the hospital daily. This would greatly reduce unnecessary movements into the hospital zone and right-site the services to the outpatient block.

## Grand Opening

We thank the Laboratory Management for the collaboration and design discussions. It is our pride and joy to see this unit as the first clinical asset to be unveiled under Project Renaissance!

# New Executive Health Screeners

After

Coming  
Soon

Before

## Premium

Our new Executive Health Screeners (EHS) will offer a premium and relaxing ambience for our health screening patients. The new premise is scheduled to commence operations in end May 2023, at its new location in Mount Elizabeth Medical Centre (MEMC) Level 1.

Our current EHS (Level 2) premise will become a part of the future Parkway Cancer Centre (PCC).

We thank the Parkway Shenton Management for the active collaboration and design discussions.

It is certainly heart-warming to see the end product coming to fruition as we continuously strive to create a valued-added EHS experience for our patients.

## Premier Lounge

To further heighten the experience for our patients, a Premier Centre will be built. Slated for completion in 2025, this Centre will have its own Consult and Treatment Rooms.

Phase 5E-1

As the renovations progresses, the team has also identified some materials that could be recycled or upcycled to preserve some of the legacies of Mount Elizabeth Hospital and protect our environment at the same time.

Did you know that the tables at our Doctors' Lounge and Staff Cafeteria are actually recycled from Ward 4B & 5A?

Here is what Mr Terence Kua, Deputy Manager, FNB has to say about this thoughtful initiative:

### Protecting our Planet

As part of our sustainability roadmap

The idea was sparked when we stumbled upon a fire-rated door in the ward that was going to be discarded. Rather than letting it go to waste, we repurposed it to replace worn out table tops in the cafeteria.

This experience highlighted the potential of finding creative ways to reuse old or unwanted items. By repurposing and upcycling, we can reduce waste, conserve resources, and contribute to a more sustainable future for our planet.

- Mr Terence Kua  
Deputy Manager, FNB
